Abstract of EP0838770

A method for gaining access to web sites (e.g. 116) via a network by a group of user terminals (102.1,102.2), includes the steps of (a) via the network locating a web page in one of the web sites by one of the user terminals (102.1), (b) collecting the address of the web page, and (c) via the network sending the address of the web page to the other user terminal(s) (102.2). One of the web sites (116) stores the address of the located web page and sends this address to the other user terminal(s) (102.2).
